

Croner Risk Assessment

Croner has taken steps to ensure it's managing the risk of Covid-19 across the business. We have:

1. Continue to engage with all of our employees currently working from home including those in the higher risk category
2. Continue to implement controls for a safer workplace for employees
3. Safe operating procedures in place for employees displaying or experiencing symptoms
4. Additional PPE provided for employees when required
5. Implemented increased hygiene control measures
6. Safe operating procedures for field based employees visiting clients premises
7. Update employees as we make change to our working practices on sites, through information and training
8. Communicated all requirements to our employees
9. Utilize virtual software to reduce risk of face to face contact, where applicable
10. Continued to support our employees health and wellbeing through regular communication and access our award winning employee assistance programme (EAP)

We will continually review our COVID secure risk assessments and safe operating procedures on Covid-19 to ensure they reflect our commitment to our workforce and current government guidance.
